A Key Ingredient For Sustainable Tourism

## THE SUSTAINABLE DINER:

In support of the Philippine government and other sectors' effort to develop and harness sustainable consumption and production (SCP) strategies, WWF-Philippines has entered into a project named "Establish Low Carbon Consumption and Production in the Philippines" otherwise known as *"The Sustainable Diner: A Key Ingredient for Sustainable Tourism."* The project is currently assisting the food service sector in transitioning into a low carbon industry by espousing sustainable approaches and participating in the crafting of national and local SCP policies. It also helps raise consumer awareness at the national and local level with regard to SCP by engaging the dining public into discussion fora/platforms and through information, education, and communication campaigns.

## WHAT IT MEANS TO BE SUSTAINABLE

Promotion of local and sustainable sourcing

Reduction food waste

Efficient use of resources such as energy and water

Reduction overall waste- single use plastics

Promotion of plant based consumption/lessening meat consumption

2017

- Launched our project and held an Inception Workshop
- Established partnerships with LGUs and National Government Agencies
- Reviewed existing relevant policies
- Conducted Round Table Discussions

2018

- Gathered project stakeholders for a Policy Dialogue
- Facilitated Action Planning Workshops with NGAs and LGUs

2019

- Established partnerships with the Department of Tourism
- Part of the Technical Working Group for the National SCP Action Plan with NEDA
- Part of the Technical Working Group for Food Donation Bill under the House of Representatives
- Food Waste Policy with the DENR
- Assistance to LGUs in crafting SCP related ordinances
